Use this formula to find the area of the triangles below:  $\text{area} = (\text{base} \times \text{height})/2$   = 1 square unit

Then, find the area again for each triangle by counting the square units.

Example:   $\text{area} = (\text{base} \times \text{height})/2 = (2 \times 1)/2 = 2/2 = 1$

Area = half a square unit + half a square unit = 1 square unit

1)

Area = 4 square units

2)

Area = 1 square unit

3)

Area = 5 square units

4)

Area = 4.5 square units
